There are established systems and procedures for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports complex, computers, classrooms etc. The institute has maintenance wing that oversees the maintenance of buildings, classrooms and laboratories. The maintenance wing is headed by the Registrar who in turn monitors the work of the Supervisor at the next level. The infrastructure pertaining to physical, academic and support facilities in institute are regularly maintained to ensure that they are of maximum benefit to the students as well as teaching and nonteaching staff. Staff members are deputed to ensure maintenance of the campus. There are various committees like Library, Sports, Website Development, Gardening, Canteen, etc. to ensure proper maintenance and upkeep. Suitable budget is allocated every year for the maintenance of various facilities. The various committees meet regularly to monitor the optimum use of infrastructure which is accessible to the students and staff of the Institute. Most of the lectures take place in classrooms with projector, microphone and speakers. This is to ensure usage of new audio-visual pedagogical techniques during the teaching process. Along with this we have open classrooms where lecture is given. The institute has a Multimedia Section and Computer Section and there are technical assistants to ensure proper upkeep of the various ICT enabled classrooms including computer centre. The Computer Lab has been set up to be used by various departments. Students make extensive use of the facility for reading and research. The campus also offers facilities such as Canteen, Common Room and Gymnasium. A OPD dispensary and Hospital with doctor and nurse is available in the campus for first aid and hospitalization cases. There is Atisha Hall where plays and other cultural activities are performed. Both the Library and administration section of the institute have undergone computerization. The library is fully digitized and is open even after class hours. It has computer terminals with internet facility and large reading spaces. A regular update on new additions is provided by the library. A library committee works regularly to oversee the functioning of the library and various other committees' coordinate with each other to enable the students to get maximum exposure and participation and also to avail all the facilities provided by the Institute. An eco-friendly environment is of prime importance in the Institute. Sports and Games is an internal part of the Institute and coaches are available for the students - Table Tennis, Baseball, Volleyball, Badminton Court are few of the highlights Solar panels and garbage segregation in the hostel and residential are takes care of the environmental needs.

7.2 – Best Practices

7.2.1 – Describe at least two institutional best practices

Best Practice - I- Green Sustainability Project Objectives As an integral part of the University's quality sustenance and management, the green sustainability components were marked right from the inception of the University which has subsequently made it a place of serenity with greenery not only in terms of shady trees and gardens but also the University has shown its concern about the increasing global degradation and depletion of natural resources. The main objective of this project is to protect the global ecological integrity with its green movement which has now been assimilated by the students, faculty and other stakeholders attached to the University. The Context The Green Sustainability Project in CIHTS has been implemented in context of the environmental sustainability involving all stakeholders of the University with their participation in environmental management which contributes immensely to their academic and psycho-social development individually as well as contributing to protect the environment in the global context. The project provides students with a richer experience through intervention of nature and its components which are considered as the core objectives of education. Focused on the dynamic connection between humans and the natural world, the Green sustainability Project has been realized in context of helping all stakeholders to create a better relationship with the ecosystem. It also generates a strong sense of place and awareness of the surroundings that allow all the stakeholders to become enlightened to institute's sustainable philosophy. This project enhances the campus atmosphere towards our long term goal of sustainability for generations to come. The Practice The project of Sewage Treatment Plant (STP) at CIHTS was taken up with an objective to improve the environment and public health. The treated water is used for irrigation and other purposes which reduce the withdrawal of underground water and consumption of electricity. This project has been prepared and acted upon by the empaneled Architect Consultant, Government of India with the cost around Rs. 42.33 Lacs. The Water Recharging System Project under the rain-water recharging mission of CIHTS was taken up with the purpose to uplift the ground water level by compensating the water being withdrawn through tube-wells. Thus, it fulfils the nation's objectives of sustainable water uses. Keeping in mind the Government mandate i.e for more than 2000 sq. mt. campus area, Water Recharging System must be provided, an integrated water recharging system has been developed. To our great satisfaction, the level of the ground water has arisen significantly. The Botanical Assessment was undertaken to procure the data of various plants and trees in context of their present status and further requirements for their sustenance and maintenance. Comprehensive assessments of perennial plants, winter seasonal flowering plants and summer seasonal flowering plants were undertaken. Furthermore, action was also taken to immediately remove and replace 152 nos. of hazardous plants mostly of Dumb cane/ Dieffenbachia varieties. CIHTS also runs a medicinal herbal farm located in Tawang, Arunachal Pradesh. The farm sits on five and a half acres at an elevation of 4,200 meters. Many rare and endangered species of plants of the Himalayas are under threat from improper harvesting practices and development. In this way, Tibetan medical practitioners are playing an important role in plant conservation. The

plants are carefully cultivated and harvested by the project staff ensuring quality and sustainability. In the future, there is the hope that the development of herbal crops can contribute to the socio-economic welfare of the regional communities. The De-Compost Pit has been initiated in the campus with the attached plan of Vermin Culture in progress. The vermin culture has been initiated with the following objectives: • Utilization of vermin culture for minimizing environmental pollution and to provide good organic fertilizer to our plants. • Earthworms are capable of accumulating toxic and reduce mainly metal agrochemicals. Moreover, the presence of earthworm indicates soil fertility • Dried earthworms are used as medicine for the treatment of wound, piles, chronic boils, sore throat, jaundice etc. • Earthworms prevent soil erosion. Thus, increasing its water holding capacity. Evidence of Success The success of the Green Sustainability project in the campus is evident mainly through all the praise it receives from its visitors. The institution is visited by people from all over the world. All the visitors praise the greenery and cleanliness of the campus. Another success is that the temperature inside the campus is always 2-3 degrees less than outside. Also, because of the greenery, a wide variety of birds can be found inside the campus, which is a clear indicator of a healthy atmosphere. Best Practice - II- Research Work in CIHTS: A Milestone in Buddhology Tibetology Objectives An enormous amount of Ancient Indian literature of Buddhism and other various disciplines were translated into Tibetan from Sanskrit. But unfortunately, most of the original Sanskrit texts lost in course of time. This great treasure of knowledge mandates rigorous research endeavors to restore them into Sanskrit from Tibetan versions and make them available into other languages like Hindi and English.

Unpublished MSSs, another treasure, is to be brought out with thorough research. Creation of dictionaries of general and technical natures are part of the exercise. The research works in CIHTS is carried out as envisaged in the objectives of the University which makes a deep impact on revival of ancient Nalanda tradition and on modern system of knowledge and society. The Context The great tradition of the knowledge and wisdom of ancient Nalanda, Vikramshila and Tkshashila went to Tibet with huge amount of literatures translated along with the teaching transmission and practices. This legacy is one of the world's greatest treasure but preserved only in Tibetan as most of the original Sanskrit texts lost in course of time, particularly during the Chinese invasion. Hence, it was envisioned to restore the lost treatises of Buddhist philosophy, epistemology, logic, metaphysics, psychology, science of mind, medicine, arts and many others into Sanskrit from Tibetan sources and translate them into modern languages for general people. This also includes researches on unpublished rare MSSs which are critically edited and creation of lexicons of various nature. This knowledge system is still extremely relevant today as it reveals the realities of mind and matter comprehensively at a very high level. The legacy of Nalanda is very significant for India and for the rest of world as it has the potentials to benefit the entire humanity. The Practice The University undertakes research works with high level of scholarship in Indology, Buddhology, Tibetology, Sanskrit and various other languages with expertise in ancient Indian scripts in the case of research on MMSs applying modern research methodology. The practices of the five research departments: Restoration Department This department Restores the important lost works of the great ancient Indian masters like Nagarjuna, Aryadeva etc. of Nalanda and others. The restoration work is a tedious work which needs expertise in at least two languages, command on the subject and scripts. It is done with meticulous efforts to regain the originality of the text of the author with thorough research on his other works, in terms of vocabulary, style etc. So far around 90 works have been restored. This is the only place in the world, where such works are done. Translation Department The Translation Department is also an important constituent of the Research Departments which engages itself in the translation of works of canonical texts of both ancient Indian and Tibetan

masters thus making them available to wide range of readers from scholars to students and from practitioners to public. The translation and the restoration works are accomplished with thorough study and research on the text, content, author and related materials providing a complete information. Rare Buddhist Texts Research Department (RBTRD) A major portion of the ancient Buddhist texts in Sanskrit had been lost in India but some portion of this lost treasure still exist in Nepal and Tibet. The Rare Buddhist Texts Research Department conducts research on the hitherto unpublished Buddhist Tantric manuscripts written in various scripts and prepares critical editions of the Sanskrit texts along with their Tibetan translations with a thorough study and research. Dictionary Department When Mahayana Buddhism and Tibetan studies, began to gain popularity around the world, there was no comprehensive dictionary of Tibetan to Sanskrit. Hence CIHTS along its project of restoration of the lost Sanskrit treatises, launched the project of comprehensive dictionary of Tibetan to Sanskrit which took more than a decade to complete. Finally, sixteen hefty volumes come out in 2005. Many technical dictionaries are being compiled and are about to be published. Center for Tibetan Literature Tibet has a huge corpus or literature covering a wide range of areas. The Center established in 2009 is the first of its kind devoted to studies and researches exclusively on Tibetan literature. Its first priority is to write a comprehensive history of Tibetan literature. The draft in four bulky volumes are brought before the scholars for comments. It has been producing other important literary works.

7.3 – Institutional Distinctiveness

7.3.1 – Provide the details of the performance of the institution in one area distinctive to its vision, priority and thrust in not more than 500 words

Buddhism and Tibetan Studies: The Legacy of Ancient Nalanda Tradition Nalanda Tradition reaches Tibet in entirety: The transmission of Buddhism from India to Tibet in 7th Century AD took place in an unprecedented manner that a huge literature, over five thousand treatises were translated along with transmission of knowledge and spiritual system from Nalanda, Vikramshila, Takshashila and others, the capital of knowledge in ancient India. The entire legacy was not only preserved, nurtured but advanced further in Tibet. Nalanda Tradition Back to India: After the Chinese occupation of Tibet in 1959, His Holiness the Dalai Lama, followed by many masters and thousands of Tibetans sought refuge in India in 1959. Right away, His Holiness re-established major traditional monastic Institutions in India so that the study and practice of Tibetan Buddhism and allied studies could go unimpeded. These monastic Institutions, where erudite Tibetan masters taught, became a source of attraction for scholars and students from around the world. Central Institute of Higher Tibetan Studies was established as a result of discussion between His Holiness the Dalai Lama and Pandit Jawaharlal Nehru with specific objectives to preserve the Tibetan knowledge system and culture, to restore the lost Sanskrit treatises from Tibetan sources and to provide educational opportunity to Tibetan and Himalaya students who lost the opportunity to go to Tibet for higher education and conduct researches on traditional subjects. Incorporation of the Nalanda Tradition into the Teaching Faculties is based on the objectives of preservation of Tibetan knowledge system. Accordingly, the academic programs of teaching and research at CIHTS are designed. CIHTS has not only incorporated modern subjects and languages but also has programs and projects incorporating other Indian philosophical schools of thought, Western philosophy and modern sciences. The five Teaching Faculties of CIHTS were established primarily based on the classical treatises of the masters of Nalanda, Vikramshila and others.

The Departments of Mool Shastra and the Sampradhyayas Shastra focus on the treatises of Indian masters and Tibetan masters of different traditions covering a wide range of areas: philosophy, metaphysics, epistemology, logic, psychology, cognitive science, mind training and spiritual system, which itself is a huge domain. The Departments of Tibetan Fine Arts, Tibetan Jyotish and Tibetan medicine have substantial contents on ethics and Departments of social sciences, ancient and modern Languages also cover topics like universal responsibility, non-violence and altruism. The Teacher's education syllabus has incorporated contents on compassion, logic, epistemology, and regulation of emotions which are highly appreciated by the NCTE for making the course transformative for the first time in India. The Sowa-Rigpa Department with its rich unique tradition has units of teaching, hospital, pharmacy and research. The Department attracts patients from neighboring states and even from foreign countries for the treatment. Five Research Departments dedicated to the works of Nalanda tradition are engaged in various nature of researches related to the preservation and dissemination of the Tibetan studies rooted to Nalanda tradition: (1) Restoration, (2) Translation, (3) Rare Buddhist Text Research, 4) Dictionary, and 5) Centre for Tibetan Literature.

8.Future Plans of Actions for Next Academic Year

1. The coordinator IQAC apprised the committee that NAAC has issued a separate manual for Sanskrit Universities which seems more appropriate for CIHTS in preparing the SSR for its assessment. The committee thoroughly examined the templates of the said manual and found it more suitable for the Institute. The committee resolved that NAAC should be approached to enlist the CIHTS in the category of traditional Universities as the academic nature of the Institute is almost similar as of traditional Universities (Sanskrit Universities). The Vice-Chancellor should write a letter to this effect and if possible a meeting with NAAC authority be arranged to apprise and convince them with the facts and if NAAC permits, the SSR be prepared on the basis of the templates introduced for traditional Universities. 2. The committee discussed about the proposal and resolved that for the value addition and academic improvement of the students in English language, such courses be started in the Institute. 3. The committee discussed the matter and decided that the e-mail ID of all students be prepared which is one of the requirements of NAAC for student's survey. Therefore, prior to submitting the SSR, e-mail ID of students be uploaded on web-site of the institute. 4. The committee discussed and resolved that as per the judgment of the Honorable Supreme Court, the reservation roaster be prepared and then the vacant teaching and non - teaching posts of the Institute be advertised for recruitment. The decision of the Honorable Supreme Court must be adhered for its implementation.
